DETAILED ACTION

Information Disclosure Statement

1. The Examiner has considered the information Disclosure Statement April 2, 2002, and the initialed copies (two copies) of the IDS are attached with this correspondence.

Specification

2. The abstract of the disclosure is objected to because the figure number (fig. 4) at the end of the abstract should be deleted. Correction is required. See MPEP § 608.01(b).

Claim Objections

3. Claims 1-32 objected to because of the following informalities:

The claimed “reverse rotating the phase changes,” in claims 1-4 and 17-19 should be clearly recited as being responsive to the “reverse rotated phase samples” in lines 4-5.

“The phase difference of two consequent symbols” in claims 6 and 22 should be written as---a phase difference of two consequent samples---.

“The reliability figure” in claims 11 and 27 should be written as ---a reliability figure---.

Claims 5,7-10,12-16,21,23-26 and 28-32 are inherently objected as being dependent on the objected base claims, claims 1 and 17.

Appropriate correction is required.

Allowable Subject Matter

4. Claims 1-32 are allowed.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patent number 5,712,877 issued to Ho et al. disclose a receiver for receiving Tamed Frequency modulated signal using a maximum likelihood detection.

6. This application is in condition for allowance except for the following formal matters:

The objection to the claims indicated above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
